TECHNICAL SKILLS

LANGUAGES

JavaScript · TypeScript · Python · Java · C# · SQL

FRAMEWORKS

React · Node.js · NestJS · Flask · Spring Boot · Unity

TOOLS & PRACTICES

Git · Docker · PostgreSQL · REST APIs · CI/CD · Agile

PROFILE

Software Developer working across the backend, frontend, and data/AI, currently pursuing a B.Eng. in Computer Engineering at the University of São Paulo (USP) and a Bachelor's Degree in Systems Analysis and Development at UNIASSELVI. Experienced in building web systems, APIs, automation tools, and dashboards for institutional and commercial projects alike — turning real-world problems into scalable, well-tested, maintainable software.

EXPERIENCE

Junior Software Developer
Jun 2026 – Present

Centro de Pesquisas Avançadas Wernher von Braun

- Develop interactive systems and software applications using C#, Unity, and AI, from feature implementation to system integration.

Web Developer & Tool Developer
Nov 2024 – Jun 2026

Visio.ai — Growth Team

- Owned the company's marketing website end to end, improving performance, SEO, and conversion-oriented UX as part of the Growth team.
- Built and maintained internal back-office tooling, integrating AI-driven automation into operational workflows.

Systems Development Intern
Nov 2024 – Apr 2026

University of São Paulo — School of Management (CODAGE)

- Built and maintained the department's official website and an interactive dashboard for training data analysis, supporting staff development decisions.

Technical Board Member
Feb 2024 – Nov 2025

SAEComp — Computer Engineering Student Union, USP São Carlos

- Built attendance-tracking automation for meetings and events, and maintained the organization's official website.

FEATURED PROJECTS

Itaú Backend Challenge — Transactions & Statistics API
Java · Spring Boot · Docker

In-memory REST API with real-time statistics, complete unit and integration test coverage, and OpenAPI documentation — my solution to Itaú Unibanco's backend hiring challenge.

TaskMaster — Task Management Web App
Flask · SQLAlchemy · JS

Full-stack app with hashed-password authentication, session management, and an AJAX-driven dashboard for per-user task management.

Quantitative Investment Strategies
Python · scikit-learn

Supervised-learning models for systematic asset allocation and technical trading, backtested against market benchmarks, with Sharpe ratio and drawdown analysis.

Developer Portfolio
React · Tailwind · Vite

Personal portfolio site with dark mode, custom animations, and a functional contact form — live at portfoliojoseramos.vercel.app.
